

Tree Trimming Request

The City of Prineville Public Works Department requests that property owners participate in the trimming of trees adjacent to the street. Many of the trees are preventing paving, patching, sweeping, and regular maintenance activity from being performed that is necessary along the curb line. Some trees may also be blocking street signs which need trimmed.

City Staff would like to provide residence the opportunity to trim trees to their satisfaction and meet the City's requirements that are shown in the above diagram. Once trimming is complete, please stack the limbs neatly on the curb line and contact Staff at the following numbers and the City will remove the limbs at no cost.
